Berendsen to Exhibit at the 2008 QME Stand 9119

Berendsen Fluid Power is proud to announce that for the third consecutive year, we will be exhibiting at the Queensland Mining and Engineering Exhibition (QME). The QME is a major mining and engineering industry event that will once again be held in Mackay, QLD from 22 – 24 July 2008.

With extensive experience and involvement in fluid power applications across the mining and engineering industries, Berendsen has specialist capabilities dedicated to open cut, underground and long wall mining support and services.

At this year's 2008 QME, Berendsen will be showcasing one of Australia's strongest ranges of leading edge hydraulic brands, products and technologies. Specific capabilities we will be showcasing at our stand include:

Hydraulic Product

Leading hydraulic brands including Eaton, Char-Lynn, Vickers, Nordon, Fairfield, Power Team, Olaer and Manuli.

Service & Repair

Onsite service and in-house repairs to all hydraulic equipment, including cylinders.

Manufacture

Design and manufacture of standard and tailored products including power units and cylinders.

System Application & Design

Highly skilled engineering and design team offering specialised assistance and customised solutions.

As Australia's largest locally owned hydraulics company with a nationwide network of 12 branches, Berendsen is fully equipped to deliver customers a prompt and fully integrated fluid power solution – whatever the requirement.

To find out more about these and other capabilities, as well as how we can meet your individual requirements, visit us at Stand 9119, located outside, directly opposite Hastings Deering (Aust) Ltd.

For further information about QME please visit the shows' website at www.qme.reedexhibitions.com.au. For further information about Berendsen Fluid Power please call us on 1800 814 411.
