Berendsen's NEW state of the art Wollongong facility

Berendsen Fluid Power is proud to announce the opening of their custom built Wollongong Branch, located at 4-6 Brady Street, Berkeley NSW.

The state of the art facility located in Berkeley, approximately 13 kilometres south of Wollongong, features a fully equipped modern workshop and office, with a workshop floor space of 1,500sqm.

The new capabilities of the branch, including the introduction of an overhead crane with lifting capabilities of up to 10 tonne, will greatly enhance the level of services provided to local customers within the Illawarra region.

As Australia's largest locally owned hydraulic company, with 12 branches located nationwide, the construction of this new facility demonstrates Berendsen's commitment to investing resources into their branches and local communities around the country.

Berendsen Fluid Power is Australia's largest independently owned hydraulics company and is proud to offer Australia's most comprehensive range of fluid power products, service & repair facilities and system solutions. Berendsen has extensive experience and ongoing involvement in fluid power applications across a wide range of industries, including Mining, Agricultural, Marine, Transport, Construction and Manufacturing.

To find out more about the new Wollongong Branch or for further information about how Berendsen can help your business, please contact Berendsen Fluid Power on 1800 814 411.
