What do we offer?

✓ FIELD SERVICE & REPAIRS

Our team of experienced field service technicians with fully equipped service vans are capable of completing a wide range of hydraulic service and repairs. Our vans are fitted with the tools, diagnostics and spares to get you back up and running in no time. Our technicians also have access to specialist tools and equipment at the branch for larger projects or repairs.

✓ WORKSHOP REPAIRS

Our fully equipped modern workshop boasts facilities to strip, rebuild and test a wide range of hydraulic components. Our cylinder stripping bench, pump test rig, motor test rig and valve test bench ensure your components are thoroughly tested before being put back into operation. Our technicians are experienced repairing a wide range of brands including Eaton, Char-Lynn, Sunstrand, Sauer Danfoss, Rexroth, Staffa, Lucas, Torque Hub and Parker. Our state of the art machining area includes a 3 metre lathe, radial drill and milling machine.

✓ HYDRAULIC PRODUCT SUPPLY AND SALES

Berendsen Fluid Power Melbourne have a wide-reaching supply network that allows us to provide you with the right product for your application. Our product range includes hydraulic motors, pumps, cylinders, valves, brakes, power steering, power units, manifolds, filters, accumulators, gearboxes and hose and fittings. Our products are used in a wide range of applications including mobile, lifting, agriculture, mining, off shore and manufacturing. We are proud of our long-standing relationships with world class suppliers such as Eaton, Vickers, Char-Lynn, Nordon Cylinders, Oil Control, Husco, Fairfield, HMA, Torque Hub, Oaler, MP Filtri, Aeroquip, Ausco, SAI and SPX Power Team.

✓ SYSTEM AND APPLICATION DESIGN

Our experienced engineers based at Berendsen Fluid Power Melbourne, with the support of our national engineering division are able to provide a complete range of engineering services and specialised assistance including application engineering and design, installation and commissioning, project management for systems of all sizes, reference and resource compilation and quality process maintenance.

✓ MANUFACTURING

We are pleased to offer our customers the manufacturing services of our Newcastle branch specialising in the manufacture of cylinders, manifolds and power units. With numerous CAD and CAM stations, our engineers are able to efficiently develop and implement practical solutions to suit your needs.
