

Berendsen Services High Profile Mine Site

Berendsen Fluid Power recently commenced a major hydraulic services contract for a high profile mine site in NSW. The client is one of the world's largest gold mining companies, operating in Australia, Indonesia, Papua New Guinea and West Africa.

The two year contract is for the servicing of various hydraulic components and systems onsite during site shutdown event.

Over the contract period, the Berendsen Sydney team will be involved in six site shutdowns. Our team of four field technicians assigned to this project will be required to complete a variety of hydraulic service work during the shutdown to ensure minimal site downtime. Some examples of the onsite service work to be completed during the shutdowns include:

- ✓ Conveyor roll back braking unit service and maintenance
- ✓ Take up winch service
- ✓ Luffing unit service
- ✓ Drive unit service
- ✓ Grinding mill brake service
- ✓ Lubrication of equipment
- ✓ Changing of filters
- ✓ Repairing leaks
- ✓ Oil sampling and testing of performance systems
- ✓ General site maintenance

In addition to the onsite work, the customer also regularly sends equipment to our fully equipped Sydney branch workshop located in Wetherill Park, NSW. Service work completed in the workshop includes the ongoing repair and maintenance of various hydraulic components and systems

including cylinders, shell and tube heat exchangers and power units.

In addition to the execution of the service contract itself, Berendsen's Sydney team completed significant preparation in the lead up to the commencement of the contract including:

- ✓ Completion of a five day site induction course
- ✓ Ensuring service vehicles meet strict site requirements
- ✓ Ensuring PPE and uniforms meet strict requirements specific to above and underground mine work
- ✓ Provided certifications to endorse our capabilities including trade certificates and supplier agreements
- ✓ Completion of drug and alcohol testing

As Australia's leading hydraulic provider for over 20 years, Berendsen is experienced in a variety of hydraulic service types for all types of hydraulic systems, machinery and equipment. Our branches Australia-wide are equipped with the expertise and tools to conduct service such as cylinder repair service, field and emergency service, hose service, lubrication unit service, preventative maintenance and pump and motor repair. Talk to the Berendsen team today to discuss your hydraulic service requirements.
